

**Name – Mr.Pyae Phyo Thein (J)**

Position – IT Support / IT Specialist

Age- 04/04/1996 (28)

Phone Number - 0618519347

## **PROFILE**

Experienced IT Specialist with over 8 years of expertise in IT support, system administration, and network management. Skilled in troubleshooting hardware and software issues, configuring and maintaining IT infrastructure, and ensuring cybersecurity compliance. Proficient in Microsoft 365, Active Directory, SaaS platforms, and cloud technologies. Adept at optimizing system performance, resolving technical challenges, and providing exceptional user support. Passionate about leveraging technology to drive efficiency and enhance business operations.

## **PROFESSIONAL EXPERIENCES**

### **Web Developer**

Raja Ferry Port Public Co., Ltd., Thailand,  
Bangkok (Current Role)

- Rebuilt and modernized the company's main customer-facing website (<https://goorca.com>) using **C# ASP.NET** framework and **Python (Flask)** for API support.
- Integrated and implemented the **mPAY ONE** payment gateway for online transactions including credit card, PromptPay, and internet banking.
- Connected and maintained APIs for **ferry route management, bus transport systems**, and upcoming integrations such as **zoo, hotel, restaurant**, and other tourism services.
- Designed and developed new backend functionalities using **C#** with **REST API** architecture, improving data flow between booking systems and the front-end user interface.
- Deployed and managed web applications using **IIS (Internet Information Services)** on a **Windows Server environment**.
- Handled troubleshooting, debugging, and resolving **CORS, Mixed Content**, and **HTTP errors** during development and deployment stages.

- Applied responsive design principles to optimize web performance across various devices and screen sizes.
- Worked with **SQL Server** and managed backend logic for payment processing, booking summaries, and route details.
- Planned and implemented future expansion projects such as integrated hotel, restaurant, and tourist attraction booking modules.

### **Key Technologies Used:**

- **Languages & Frameworks:** C#, ASP.NET, Python (Flask), HTML5, CSS3, JavaScript
- **APIs:** mPAY ONE, Raja Ferry API, Custom REST APIs
- **Tools & Platforms:** IIS Manager, Windows Server, SQL Server, GitHub, Postman
- **Other:** Payment gateway integration, API error handling, deployment optimization, rajaferryport api route integration
